### 3. SSL Certificates

Your visitors, prospects, and customers are on their guard. These savvy Internet users are wary of Web sites and online businesses that aren't what they claim to be, and worried that their personal and financial information might fall into the wrong hands.

A Secure Certificate verifies that:

- You completed the application to obtain the issued certificate.
- Transactions with your site are secure and supported with industry-standard 128-bit encryption or high grade 256-bit encryption.
- Your customer's sensitive information is encrypted and remains private.

We offer two types of Secure SSL Certificates, as well as multiple sub-domain versions and our prices starting at only \$27.95/year.

With every SSL Certificates application you get:

- 99% browser recognition
- Up to 256-bit encryption
